Subject: TRI PFAS Search
Attachments: Testmethods537and533.xlsx

Hi Antony,

We have another PFAS search that you might be able to help us with. The NDAA requires us to evaluate the following PFAS for addition to the TRI list:

“(N) each perfluoroalkyl or polyfluoroalkyl substance or class of perfluoroalkyl or polyfluoroalkyl substances for which a method to measure levels in drinking water has been validated by the Administrator”

We were provided the attached list of chemicals that are covered by test methods 533 and 537.1. These are all the parent acids but we have been told that **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Any help much appreciated.

Thanks.
Dan
